While Ray, who won the American into undisputed possession of first place after having been tied with Yale the world's record, made no complaint of his defeat in Boston by Caldwell and Devannery, it is known that the track over which the men ran was all against a runner of the champion's type in that he prefers long stretches on which to show the strength of his unusually sustained sprint, which he was unable to inject into his running on the Hub track, which is but 130 yards in circumference.

The 22d Regiment Armory track is concededly one of the fastest indoors, being an eighth of a mile in circuit, with fine sweeping turns and straights about sixty-five yards long, which will warrant every man in being able to do his best at any stage of a race. That the mile race at the Fordham games will be productive of a new indoor record in the idea of many close followers of the sport.
